PROJECTS

[Location based Friend Finder – A Social Networking Web App](#) - Python, FastApi, Svelte-(kit),

TailwindCSS, Open StreetMap

- Developed a full-stack social networking app with FastAPI, SvelteKit, SQLite, and Tailwind CSS, enabling chat, friend requests, and user search by username, topic, and pincode.
- Implemented session-based authentication using cookies, ensuring secure and persistent user logins.
- Built RESTful APIs for user management, friend requests, and search functionalities, optimizing performance and data validation.
- Designed a responsive and user-friendly UI using Tailwind CSS, ensuring a smooth experience across devices.
- Deployed using Docker, ensuring a scalable, containerized environment for efficient deployment and management.

[Secure Password Manager \(CLI\)](#) - Python, SQL, Cryptography, Argparse

- Built a command-line password manager to securely store and manage user credentials using a master password.
- Used SQL for efficient storage and retrieval of encrypted login data.
- Implemented AES encryption and key derivation to ensure strong data protection.
- Designed an intuitive CLI with argparse for seamless add, view, and delete operations.

[Deep Launcher](#) - Flutter, Android, Dart

- Built a simple Android launcher with clean UI and grayscale app icons, used daily by me.
- Implemented app listing, search, and fast launching with smooth Flutter performance.
- Added multiple pre-built themes that users can switch between for a personalized look.
